Taking orders and shipping boxes is not the way we distribute. Cardinal Tracking has been a Value Added Distributor of Mobile Computing Devices since 1985. Cardinal will help you to keep up to date on new and improved mobile equipment and efficient ways to move your handheld software to completion. Cardinal's B2B Value Added Distribution Program consists of the following services:

◆ Flexible Handheld Evaluation Program

Need a handheld device for a "hands on" evaluation? Our evaluation program

Includes a variety of pre-loaded demonstration software to give you a genuine feeling of on-site functionality and usability!

◆ Handheld Software Development

In the process of creating handheld applications since 1985, Cardinal has developed **MTAG—Mobile Transaction Application Generator** software. It is a Rapid Application Handheld Software Development Tool that allows us to build mobile and wireless data collection applications for a variety of different handheld devices in record time. If you have a project you want to bring to implement with both quality and efficiency, talk to us about **MTAG!** If you prefer to build the application yourself, and you have in-house technical capability, **MTAG** can be licensed to your development staff allowing you to build, modify and enhance your own applications.

◆ A Selection of Versatile and Rugged Handheld Computers

Casio, Epson, and Radix

◆ Custom Peripheral Integration

Tell us your hardware requirements and we will source and deliver a complete hardware solution to you or your customers. We offer custom assembly for your project, integrating devices such as mag-card readers, bar-code readers, CDPD modems, and any mobile or wireless component. We work with the peripheral vendors to make sure you get the **right** equipment the first time!

◆ Authorized Service Center

Cardinal Tracking is an authorized service center for Epson and Casio handheld products. You are assured of quality service, a loaner program, a quick turn around time, and a level of consistent service you can count on!
